60	LONG BEACH, CITY OF	51.0%	52.3%	1.3%
61	PASADENA, CITY OF	51.0%	52.3%	1.3%

FY 2000-2004

Base MediCal Factor provided to counties for the FY 2000-2001 AFA. Currently used.

Source: Based upon interviews with current and prior MCH employees it is assumed, but not documented, that the M/F percentages are from the Statistical Master File using 1998 or 1999 actual data. Data cannot be confirmed.

FY 2004-2005

Medi-cal paid births as a percentage of total county live births.

Source: HEALTH DATA SUMMARIES FOR CALIFORNIA COUNTIES 2002. (2000 Actual)

Note: The M/F was derived by dividing the total number of MediCal Fee For Service/HMO/PHP paid deliveries by total live births by residence. This method of calculating the M/F, along with birth and discharge data from the most recent HEALTH DATA SUMMARIES FOR CALIFORNIA COUNTIES book, will be used for FY 2004-2005 and future years for the purpose of producing the MCH Program MediCal Factor percentages for each county/city.
